

Falkland Islands Government – Job Description

Job Title:	Power Station Operator		
Department:	Public Works Department	Section:	Power & Electrical
Reports to:	Mechanical Supervisor		
Grade:	Falkland Islands Government Grade - G2		

Job Purpose

To generate and distribute electricity to Stanley and the surrounding area.

Main Accountabilities:

- Prepare, monitor and control the running of power generating plant and ancillary equipment.
- Control and monitor the output of the Sand Bay Wind Farm.
- Keep the station clean, ensuring a safe workplace.
- Keep a regular visual check on the premises and vehicles parked at the station outside normal working hours.
- Train new staff to operate and monitor all aspects of electricity production.
- Maintain each generator at predetermined levels of capacity ensuring high efficiencies are maintained.
- Assess and log emergency problems reported by the public and contact on-call Power Station staff as required.

The job description is not an exclusive or exhaustive definition of your duties. You shall undertake such additional or other duties as may reasonably be required by FIG commensurate with your role and grade.

Additional Information:

Being the only person at the station for almost 70% of the working hours, the post holder must be able to make all decisions associated with production either in normal running or in an emergency situation.
