**Retail Prices Index**

The Retail Prices Index for the quarter ended 30 September 2021 has now been completed.

The Index has increased by 0.9% to 107.227. The change in the Index over the year to 30 September 2021 has been +2.8%.

Date	Index	Quarterly % Increase/ (Decrease)	Annual % Increase/ (Decrease)
30.09.2020	104.301	1.3%	(1.7%)
31.12.2020	103.851	(0.4%)	(2.0%)
31.03.2021	105.248	1.3%	(0.7%)
30.06.2021	106.317	1.0%	3.3%
30.09.2021	107.227	0.9%	2.8%

There is no evidence of inflation in the “Food and non-alcoholic beverages” category; changes in prices in this category contributed with -0.2 percentage points to quarterly inflation and prices are unchanged when compared to one year ago.

“Fuel and power” contributes with +0.4 percentage points to quarterly inflation and +0.6 percentage points to annual inflation, mainly driven by an increase in the price of electricity (+0.4 percentage points both at quarterly and annual level). The case of electricity is a clear example of the impact on the Index of “base effects”: there is a growth in the price of electricity (+15% compared to both the previous quarter and the same quarter of the previous year) because a significant decrease was recorded in 2020; the price of electricity has in fact now returned to its pre-Covid-19 level (23p per unit).

Comparing the Index with its level two years ago helps circumvent the impact of “base effects” due to the 2020 deflationary shock. The Retail Prices Index is 1.1% higher in Quarter 3 of 2021 than in the same quarter in 2019 - corresponding to an annualised rate of growth of +0.6%. This is consistent with the rate of growth that the Index has experienced before the Covid-19 shock, +0.8% per year between Quarter 1 in 2014 and Quarter 1 in 2020.

### Retail Prices Index

The Retail Prices Index for the quarter ended 31 December 2021 has now been completed.

The Index has increased by 1.5% to 108.853. The change in the Index over the year to 31 December 2021 has been +4.8%.

Date	Index	Quarterly % Increase/ (Decrease)	Annual % Increase/ (Decrease)
31.12.2020	103.851	(0.4%)	(2.0%)
31.03.2021	105.248	1.3%	(0.7%)
30.06.2021	106.317	1.0%	3.3%
30.09.2021	107.227	0.9%	2.8%
31.12.2021	108.853	1.5%	4.8%

The rise in fuel and power prices (including vehicle fuel) explains more than half of the annual change in inflation. Fuel and power prices are also the main contributors to quarterly inflation. On the other hand, at the moment there is no evidence of inflation in the “Food and non-alcoholic beverages” category.

The data points to an acceleration of price growth compared to previous quarters; although much of the year-over-year growth can be attributed to “base effects” on fuel prices (that is fuel price inflation today is mainly due to low fuel prices recorded a year ago, in the aftermath of the Covid-19 shock). Comparing the Index with its level two years ago helps

circumvent the impact of “base effects” due to the 2020 deflationary shock. The Retail Prices Index is 2.7% higher in Quarter 4 of 2021 than in the same quarter in 2019 - corresponding to an annualised rate of growth of +1.3%.
